Test Plan — VWO-1: VWO practice

VWO (a Wingify product) · A/B testing platform · QA Test Planning

> **Status: DRAFT — pending human review.** Not approved until a QA owner signs off.

Ticket Information (from Jira, as fetched)

Key	VWO-1
Summary	VWO practice
Issue type	Story
Project	VWO (software)
Status	To Do
Priority	Medium
Reporter / Creator	Ajaykumar Chavan
Assignee	Unassigned
Created / Updated	2026-11-07 14:02 IST / 2026-11-07 14:02 IST
Description	**Empty (null)**
Acceptance criteria	**None provided**
Components / Labels / Fix version / Sprint	None / None / None / None
Linked issues / Subtasks / Attachments / Comments	None / None / None / None
Estimate / Time spent / Due date	None / None / None

Requirement Checklist Result

Area	Result
Clear user story / goal	❌ Missing — only the title "VWO practice"
Testable acceptance criteria	❌ Missing
Happy / negative / boundary paths, state transitions	❌ Missing
Test data, environment, flags, dependencies, preconditions	❌ Missing
Performance, security/roles, a11y, i18n, audit	❌ Missing
Regression impact, compatibility, browser matrix, rollback	❌ Missing
Unambiguous wording, mockups/designs	⚠️ Title is ambiguous; no designs linked

1. Scope & Objectives

- **In scope:** Cannot be determined — the ticket defines no feature or behaviour.
- **Out of scope:** Cannot be determined.
- **Objective:** Establish what VWO-1 is meant to deliver, then verify it against agreed acceptance criteria. No functional verification can be planned until the gaps in Section 2 are answered.

2. Gaps & Questions for the author

#	Area	Finding	Question to author
G1	Goal	❌ No user story; title "VWO practice" is ambiguous	What feature, page or flow in VWO does this story cover? Is it a real feature or a practice/training ticket?
G2	Acceptance criteria	❌ None	What observable pass/fail conditions define "done"?
G3	Paths	❌ No happy, negative or boundary behaviour	What are the expected success flows, error states, and limits/empty states?
G4	Roles / permissions	❌ Not stated	Which user roles can/cannot use it?
G5	Environment & data	❌ Not stated	Which environment/URL, feature flags, accounts and test data apply?
G6	Dependencies	❌ No links or integrations	Any dependent tickets, services or integrations?
G7	Non-functional	❌ Not stated	Any performance, security, accessibility, i18n or audit expectations?
G8	Compatibility	❌ No browser/device matrix	Which browsers, devices and viewports must be supported?
G9	Regression	❌ Impact unknown	Which existing features could be affected?
G10	Designs	❌ No mockups/attachments	Are there designs or specs to reference?
G11	Planning	❌ No assignee, sprint, fix version, estimate	Who owns it, and which sprint/release and effort apply?

3. Test Scenarios

No acceptance criteria exist, so no functional scenarios are invented. The scenarios below are limited to what can be done now and what each gap blocks. Each maps to a gap.

ID	Priority	Type	Scenario	Maps to
TS-1	P0	Clarification	Confirm the ticket scope/goal with the author before any test design begins.	G1, G2
TS-2	P0	Review	Review the agreed acceptance criteria for testability (observable pass/fail).	G2

TS-3	P1	Pending	Positive, negative and boundary scenarios — to be derived once G3 is answered.	G3
TS-4	P1	Pending	Role/permission scenarios — to be derived once G4 is answered.	G4
TS-5	P1	Pending	Cross-browser/device checks — to be derived once G8 is answered.	G8
TS-6	P2	Pending	Regression of impacted existing features — to be scoped once G9 is answered.	G9
TS-7	P2	Pending	Non-functional checks (performance, security, a11y, i18n) — to be scoped once G7 is answered.	G7

4. Test Data & Environment

- **Data:** Not specified (G5).
- **Environment / flags:** Not specified (G5).
- **Roles / permissions:** Not specified (G4).

5. Risks & Assumptions

- **Assumptions made:** None about functionality. The only assumption is that the Jira data fetched on 2026-11-07 is current.
- **Risks:** (1) Building tests without acceptance criteria risks wasted effort and wrong coverage. (2) Ambiguous scope may cause missed or misdirected testing. (3) No sprint/owner/estimate puts the schedule at risk.

6. Entry / Exit criteria

- **Entry:** Description and acceptance criteria added to VWO-1; gaps G1–G11 answered; environment and test data confirmed.
- **Exit:** All P0/P1 scenarios executed against agreed ACs; no open critical/high defects; QA owner sign-off.

7. Resource Allocation

Not defined — no assignee or team information in the ticket (G11). To be confirmed.

8. Timelines, Sprint Details

Not defined — no sprint, fix version, due date or estimate in the ticket (G11). To be confirmed.

HUMAN REVIEW GATE

- **I assumed:** Nothing about the feature; only that the fetched Jira data is current.
- **I could not confirm:** Scope, acceptance criteria, roles, environment, data, browsers, regression impact, resources and timelines.
- **Open questions blocking sign-off:** G1–G11 above (G1–G3 are the most critical).
- **Approve, or edit, before I write test cases / automation.** Please update VWO-1 or answer the questions, and I will extend the plan.
